Campus Issue #05-06-07

Action Taken:
This issue was submitted by Ginny McReynolds, Charlene Graham, and Nelle Moffett on behalf of the Planning Committee, regarding the development of college goals. Constituency leaders took the issue to their groups for input. After discussion of the perspectives from the constituent groups, Executive Council reached consensus that the Planning Committee develop a set of college goals working from the list of items that were developed at the January 12, 2006 flex activity. The list of goals developed by the Planning Committee would then be submitted back to Executive Council for review and recommendation. The final set of goals will be used to develop unit plans for implementation in 2007-08. Executive Council also recommends that the Planning Committee develop a long-term process for developing college goals and to submit the proposed process to Executive Council.

President’s Response to Executive Council

I have heard the discussion on Issue #05-06-07 and concur with the recommendation to charge the Planning Committee with developing a list of college goals from the output of the flex activity and to develop a long-term process for developing college goals, all within the parameters of the college core values, mission, vision, and strategic directions.

To implement this decision,
- The Planning Committee will develop a list of college goals that will be used to develop unit plans for 2007-08
  - 3-5 goals
    - broad enough to encompass various dimensions of the college
    - do-able within 1-2 years
  - Specific targets – at least one goal that addresses the following
    - Needs of students
    - Instruction (teaching and learning)
    - Administering the college (organizational effectiveness)
  - Submit the list of goals to the Executive Council for review and recommendation
- The Planning Committee will propose a long-term process for developing college goals and submit the proposal by Sept 30, 2006 to Executive Council for input from constituent groups
