Issue/Concern  Plug in outlet for Electric Vehicles

Signature of Initiator(s)  <<signature on file>>

Provide information, which succinctly but fully discusses the issue/concern (if necessary, add additional pages).

A. Describe the issue/concern:

We used to have an area where electric vehicles could plug in and charge the batteries. With the green initiative being initiated by our college to train students in this area, it only makes sense to offer some green initiatives on our own. By giving this option to students, faculty and staff.

B. What do you recommend or suggest solving this issue/concern?

Reinstall outdoor outlets for EV charging. There should be a few areas around campus, in a few parking lots, and probably some in the parking structure.

C. How will this recommendation support the success of SCC students and benefit the campus community?

By providing the means to use green initiative vehicles such as plug in hybrids and full electric vehicles. And to show the community that we are truly concerned about being green and going green. And that we are proactive about and not sitting back and doing nothing.
